Professional Summary

Detail-oriented and proactive professional with hands-on experience in both cybersecurity analysis and frontend development. Skilled in detecting, analyzing, and responding to cyber threats, as well as developing responsive and user-friendly web interfaces. Strong understanding of security principles, incident response, threat analysis, and modern frontend technologies. Passionate about protecting digital assets while delivering seamless user experiences.

Employment History

Intern, Sabi Programmers, Akure, Ondo State
Apr 2025 – Present

- Monitor networks and systems for security breaches, events, and incidents.
- Respond promptly to cybersecurity incidents, investigate breaches, and mitigate threats.
- Analyze security alerts and escalate incidents as necessary.
- Develop and implement incident response procedures and playbooks.
- Collaborate with IT and other departments during incident containment and recovery.
- Utilize SIEM tools (e.g., Splunk) to detect and investigate anomalies.

Intern, LivePetal, Akure, Ondo State
Jul 2023 – Sep 2023

- Developed and maintained user-facing features using HTML, CSS, and JavaScript.
- Built responsive, mobile-first web interfaces with modern frameworks (e.g., React, Vue, Angular).
- Ensured UI/UX designs were technically feasible and accurately implemented.
- Optimized applications for maximum speed, performance, and scalability.
- Collaborated with backend developers, designers, and product managers to deliver cohesive user experiences.
